

STREET STOCK & MINI STOCK TIRE BULLETIN

1. Each competitor at each NHSTRA speedway must purchase tires at the track you are competing at. **Competitors are not allowed to purchase new tires at a track for competition at another track.** The NHSTRA group will be communicating with each other to make sure competitors purchase tires at the track they compete at. To be eligible to purchase tires, the competitor **must be competing** at the event on the day of purchase. **The only exception of pre purchase of tires will be on the tire sale day designated at the track you are registered and competing at on the track's season opening event.**
2. You are allowed four (4) new tires to start your season (dependent on the track's tire availability). **The new tires must be purchased at your first event you compete at unless approved by management. The four (4) new tires purchased must be used for heats and features (no exceptions) on the event day the 4 new tires were purchased.**
3. There will be no practice tires sold.
4. After your first (1st) feature race, you are allowed one (1) new tire per feature event if you competed in 75% of the feature.
5. Any special event or extra distance events, tire rule may differ, but will be announced prior.
6. Flat Tire Replacements: To replace a tire due to a flat it must be witnessed by a speedway official and the flat must occur on the track (not in the pit area), the tire **must be a new tire**. The tire replacement must be inspected and approved by a track official on the event that the tire went flat (NO EXCEPTIONS).
7. All tires must pass post-race durometer reading. Track conditions will determine base number.

****Please Note:** The above tire rule may change dependent on the availability of tires.

Any competitor purchasing new tires at one track to compete at another track will result in loss of tires and loss of championship point.
